My Acura broke down. Windows wouldn't roll up, engine ran, but I couldn't get the shifter out of "park". Battery was working. They had their towing company tow my car in. and had it ready in one day. They also told me they will work on my 1984 VW camper. That's hard to find, these days. One of only three repair shops in a 40-mile radius that will do that. When they fix my van problem they get a full 5-star review.
